SUMMARY

Data Analyst with 1+ year of experience in analyzing large-scale financial and operational datasets using SQL, Analytical Databases, Advanced Excel, Python, and Power BI. Experienced in data extraction, data validation, data reconciliation, reporting automation, KPI tracking, dashboard development, trend analysis, and business intelligence reporting. Strong knowledge of relational databases, analytical databases, SQL optimization, data quality management, and process improvement. Adept at converting complex datasets into actionable business insights while ensuring high accuracy and operational efficiency. Seeking to contribute analytical and database expertise as an Analyst L2 at Wipro.

SKILLS

Programming: Python (Pandas, NumPy, File Handling, Exception Handling, Scikit-Learn, Matplotlib/Seaborn).

SQL & Databases: MySQL, SQL, Complex Joins, Window Functions, CTEs, Stored Procedures, Triggers, Views, Indexing, Query Optimization, Data Extraction, Data Validation.

Analytics: Banking Analytics, Risk Analytics, Financial Data Analysis, Analytical Databases, Data Cleaning, Data Reconciliation, Trend Analysis, Dashboard Reporting, KPI Analysis, Exploratory Data Analysis (EDA).

Business Intelligence: Power BI, Tableau, Dashboard Development, Data Visualization.

Excel: Advanced Excel, Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Macros, MIS Reporting.

Tools: Git, GitHub, JIRA, Confluence.

Work Experience

Coforge Ltd.

Junior Associate

Mar 2025 – Apr 2026

Greater Noida, India

- Analyzed large-scale US mortgage and financial datasets using SQL, Analytical Databases, and Advanced Excel to support banking operations and business reporting.
- Queried relational databases using Joins, Window Functions, CTEs, Views, Aggregations, and Query Optimization techniques to generate business insights.
- Performed data extraction, data validation, cleansing, reconciliation, and quality checks to maintain high data integrity and operational accuracy.
- Created analytical reports and dashboards using Power BI and Excel for KPI tracking, productivity analysis, operational monitoring, and management reporting.
- Automated recurring reporting activities using Python (Pandas) and Excel Macros, reducing manual effort and improving reporting efficiency.
- Identified trends, anomalies, and process gaps through analytical reporting and collaborated with business stakeholders to improve operational performance.
- Maintained structured datasets across multiple systems while ensuring data consistency, accuracy, and compliance.
- Worked with cross-functional teams to support reporting, documentation, audit readiness, and process improvement initiatives using JIRA and Confluence.
- Received the Coforge Technovator Award for outstanding data quality, process accuracy, and operational excellence.

Beyondriffs

Web Development Intern

Jun 2024 – Sept 2024

Remote

- Developed and maintained user interface components using React.js and Tailwind CSS.
- Worked with structured user input data for form handling and validation using SQL operations.
- Supported team in managing code using Git and GitHub, ensuring proper version control practices.
- Contributed to the development of "The Indian Summit" project, focusing on UI and user experience.
- Recognized as "Intern of the Week" for performance and contribution.

ADM Education & Welfare Society

Web Development Intern

Jun 2024 – Jul 2024

Remote

- Developed a responsive website using HTML, CSS, and JavaScript.
- Built and structured web pages for an educational organization.
- Handled user input forms and basic data flow using PHP and SQL.
- Deployed and maintained the project on GitHub.

Education

Bachelor of Computer Applications (BCA)
GL Bajaj Institute of Management

2022 – 2025
CGPA: 7.0

CERTIFICATIONS & ACHIEVEMENTS

Data Analytics Job Simulation – Deloitte

Apr 2026

- Completed a data analytics simulation involving data analysis and forensic technology
- Used Excel to classify and analyze data for business insights

Technovator Award – Coforge

Jan 2026

- Recognized for maintaining high data accuracy, consistent output, and strong process adherence in US title operations

PROJECTS

Sales Performance Analytics Dashboard

- Analyzed retail sales dataset using SQL, Python (pandas), and Power BI to identify sales trends, profit drivers, and regional performance.
- Performed data cleaning, transformation, and exploratory data analysis on transactional sales data.
- Built interactive Power BI dashboards with KPI tracking, category analysis, and sales forecasting insights.
- Wrote SQL queries for business reporting and generated actionable insights to improve sales decision-making.

ZeroTrace Secure Chat Application

- Built a Python-based secure chat application using a client-server architecture with sockets, threading, and Tkinter.
- Implemented encrypted communication using RSA and SSL/TLS for protected message exchange.
- Added privacy-focused features including a self-destruct timer, kill switch, and zero server logging.
- Developed real-time multi-user messaging with client-side encryption and local chat log export support.
